It's not the longest, nor the most lethal, but it's certainly the most debated fence in the world today. The barrier being built between Israel and Palestine: will it create better neighbors or a wound that won't heal? This 3-part film—screening here for the first time outside of Israel—follows the construction of the fence over a three-year period. Award-winning director Eli Cohen investigates the political, ecological, human rights, and technological aspects of the fence, as well as the role of the media, the propaganda war, and the march of follies on both sides.
